

The Clark Pond

This pond was completed by Nemar Cobb of Alpha Aquatics just in time for the pond tour. The 5' deep bottom pond was added to an existing upper pond expanding the water to 5000 gallons. Most plants were kept in the upper bog pond while only a few lotus on stands are with the koi in the newer bottom section.

The koi were extremely friendly, obviously enjoying their new home, and it was hard for any of us to resist playing with them.
