

The Eubank's

The pond is only one of many beautiful sights to see at the Eubank's home. It is nestled in a natural part of the gardens surrounded by large butterfly bushes and colorful annuals. The pump has been converted to an external pump by use of an inverted bottom drain and the system is kept healthy and clear by a ProBead 3.1 biofilter and 65-watt Emperor UV.

No one was confined only to the pond area. Margaret invited all to explore the lake on the property and the wonderful little island reachable by way of a boardwalk and gazebo.
