

The Naessens Pond

There's something in the water at the Naessens' house! His fish grow quickly and the Aztec Arrowhead in the middle tier of the pond is the biggest and healthiest we've seen. His pond is a series of 3 pools, tiered with waterfalls in between. The largest of the pools is at the bottom where his big koi "rule".

Hidden behind a planted berm is the system consisting of a 3/4 hp external pump, ProBead 1000 and 40-watt Emperor UV. The seating area around the bottom of the pond is comfortable and planted well.

Butterflies flitter about and land on the blooming butterfly bush as one admires the antics of the playful koi.
