

The Amey! Fields Pond

Relax and enjoy the atmosphere. The 4 year old pond resembles a woodlands streambed with a plant pond on top and water meandering down a path with smaller shallow ponds along the way to a 2000-gallon koi pond at the bottom. Over 5 tons of boulders varying in size were used to create this pond's natural look. Natural woodland plants such as ferns, hostas and ivy intertwine with the rocks along the edges of the stream and pond to complete the "I've been here for a long time" feel.

Two miniature Japanese maples add height. Low voltage lighting provides a holiday resort feel at night. The seating area at the bottom of the pond allows a complete view of the pond, waterfall and stream. It all adds up to a serene environment that makes it easy to enjoy the fish!

It runs off a submersible pump and through a ProBead filter and UV.
