

Sunday Tour

The Abel/Nichols Pond

Mitch and Diana built this 3500-gallon koi pond themselves with the budget in mind. They saved money by finding rocks nearby that are indigenous to the area and by combining yard sales for objects de' art.

The system is state-of-the-art with a fish-safe skimmer and bottom drain, Jacuzzi external pump, and ProBead 1.65 biofilter. This brand new pond (only 3 months old) is 17x8 with a 20' stream with 2 waterfalls surrounded by Japanese style gardens.
