

The Carroll Pond

Open the heavy wooden gate and walk into an entertainer's paradise! Dual waterfalls splash down to pool on one side and pond on other. Stacked stone walls, fence, patio and custom built outdoor fireplace blend with brilliant colors from the flowers to form an oasis of beauty.

Inspired by our display garden at the Southeastern Flower Show, the Carroll's commissioned Neil Boyce of Blades and Blossoms to design and install all the components of their outdoor world — minus the swimming pool which was already there. Neil did, however, build the waterfall into the pool so that the whole design tied together. The pond's state-of-the-art filtration system consists of a ProBead 3.1 biofilter, 120-watt HO Emperor UV and external Jacuzzi 2 hp, 2 sp pump.
